

# Ariel Global (NZD)

Quarter Ended September 30, 2024

Markets worldwide posted gains in the third quarter, although there was a lot of volatility. The “yen carry trade” selloff in Japan and the “deflationary spiral” looming over China logged significant declines followed by a sharp rebound. Meanwhile, market leadership broadened beyond the mega-cap tech stocks and there was a notable shift towards value at the expense of growth with investors rotating into a variety of sectors. The Federal Reserve and European Central Bank’s initiation of a rate-cutting cycle as well as aggressive economic stimulus announcements in China also contributed to improving market sentiment. Against this backdrop, the Ariel Global Composite rose +2.98% gross of fees (+2.80% net of fees) in the quarter, ahead of the +2.11% return posted by the MSCI ACWI Index but trailing the +4.90% gain of the MSCI ACWI Value Index.

Ariel’s non-consensus approach seeks to identify undervalued, out-of-favor, franchises that are misunderstood and therefore mispriced. The Ariel Global bottom-up strategy is overweight Consumer Discretionary, Financials, Health Care and Utilities, significantly underweight Consumer Staples, Industrials, Communications Services and Real Estate, as well as lacks exposure to Energy and Materials. At the sector level, our Health Care and Financial holdings as well as positioning within Consumer Discretionary were the greatest contributors to returns, while our investment choices within Information Technology and Industrials were the largest performance detractors.

China-based E-commerce company, **JD.com, Inc.** was the top contributor in the quarter as the People’s Bank of China’s (PBOC) comprehensive stimulus measures bolstered investor confidence in the Chinese economy. The improving economic sentiment is fueling consumer spending which benefits the company’s retail operations. Additionally, the company’s strategic decision to diversify general merchandise product offerings, expand its third-party marketplace business and monetize advertising streams has contributed to consecutive quarterly earnings beats. JD.com is also poised to capitalize on the home appliance trade-in program, which is one of its largest product categories. Given the favorable market environment, the company’s strategic positioning and supply chain efficiency improvements, we continue to like it’s long-term growth prospects.

Israeli based provider of products for information technology security, **Check Point Software Technologies Ltd.** also advanced following solid quarterly earnings results. Double-digit billings growth was particularly strong across

geographies. Consumers appear to be adopting more pillars of Check Point’s platform and engaging in larger strategic commitments with Infinity and Quantum Force. The company also announced the appointment of new CEO Nadav Zafrir, whose reputation is well established in the cyber community. Meanwhile, Check Point continues to be an astute steward of capital, pursuing organic growth and utilizing surplus cash to return capital to shareholders. We continue to favor the company’s exposure to the fast-growing cloud security market and its industry leading profitability.

French pharmaceutical company, **Sanofi** was another contributor over the quarter as momentum for Dupixent, a dermatitis treatment, drove earnings. Additionally, positive clinical trials for myeloma drug, Sarclisa and a Phase 3 Multiple Sclerosis asset also boosted shares. At current levels, we view Sanofi’s vaccines business as underappreciated and think the immunology pipeline is being overlooked. Also, we continue to be optimistic Dupixent will be a key growth driver.

By comparison, Korean-based mobile phones and smartphones manufacturer, **Samsung Electronics Company, Ltd.** traded lower during the quarter. Investors are concerned about weakness in conventional memory demand, particularly within the personal computer and smartphone market. However, we continue to see a sustained upcycle in the server market for high-bandwidth memory (HBM) in support of artificial intelligence (AI) infrastructure. Stronger memory pricing should drive further revenue growth and operating profit expansion in the year ahead. We also like Samsung’s diversified business model and see additional upside should the company gain share in both the display market and foundry business.

Shares of semiconductor chip manufacturer, **Intel Corporation (INTC)** also underperformed following a significant earnings miss, disappointing near-term guidance and the subsequent suspension of its dividend. In response, management announced a \$10 billion plan aimed at reducing headcount and capturing cost efficiencies. We believe the company is past the trough of the demand cycle and continue to see signs of a cyclical recovery for personal computers (PCs) and central processing units (CPUs). While we are disappointed with the results, we view the sell off as an overreaction and think the market continues to overlook the progress Intel is making to advance its manufacturing process and the company’s efforts to serve as a viable second source

foundry partner of leading-edge silicon. We believe the separation of the design and manufacturing businesses will be a key catalyst in unlocking improved financial performance while also enhancing the competitiveness of the foundry business.

Lastly, shares of multinational automotive manufacturing company, **Stellantis N.V. (STLA)** declined following a significant earnings miss. The company attributed the performance to lower sales, production disruptions from a product overhaul and weak performance in North America. Muted demand for electric vehicles in Europe also weighed on performance. In response, STLA is implementing operational improvement initiatives to bring down U.S. inventory levels through production cuts, consumer incentives and gradual price adjustments. Despite these results, management maintained its previous buyback and dividend commitments. Although we expect discounting to increase as U.S. inventory ages, we maintain a constructive view on the company. We believe STLA's strong global footprint and commitment to industry leading profitability, operational excellence, and strategic foresight will continue to enhance long-term shareholder value.

We initiated four new positions in the quarter.

We purchased **Comerica, Inc.** a financial holding company whose revenue is primarily generated across three business segments: the Commercial Bank, the Retail Bank and Wealth Management. The company offers a high touch business model with an enhanced focus on long-term customer relationships. Lower deposit levels and declining demand for loans driven by the Fed's quantitative tightening regime as well as deteriorating credit conditions presented an attractive entry point. Looking ahead, we believe the company is well-positioned to take advantage of economic growth, which should lead to enhanced deposit gathering and loan generation. Additionally, we expect more moderate rate cuts to allow for margin expansion and slower deposit cost increases. At today's valuation, we believe the risk/reward is skewed to the upside.

We added marketing communication company, **Publicis Groupe SA.** We believe the company is poised to deliver solid revenue and operating profit growth over the next few years. We also expect the company's unified digital platform and unique technology offerings to present a compelling opportunity to provide more effective advertising experiences at scale through advanced identity, demographic, behavioral and transactional data analysis.

We bought **Tesco plc**, a leading food retailer and wholesaler based in the United Kingdom. Following years of intense disruption from discount retailers, the competitive dynamic in the market has stabilized, creating a favorable backdrop. Tesco is gaining market share through an improved pricing and value proposition. We think the company has the ability to

better operating margins, while continuing to benefit from alternative revenue streams such as Marketplace and Retail Media.

Finally, we initiated a position in bank holding company, **Western Alliance Bancorp (WAL).** Shares have been impacted by multiple headwinds in recent years including a poorly timed expansion into mortgage services via the acquisition of AmeriHome in 2021, persistent credit concerns amidst the Fed's rate hikes and then higher deposit costs following the March 2023 banking crisis. However, with a restructured balance sheet and diversified portfolio, we believe WAL is well-positioned for future growth in the current market environment.

By comparison, we successfully exited financial services company, **Truist Financial Corporation** and Danish multinational banking and financial services company, **Danske Bank A/S** during the period. We also sold British home and auto insurer, **Direct Line Insurance Group Plc**, Dutch international grocer, **Koninklijke Ahold Delhaize N.V.**, and one of the largest commercial banks in the United States, **U.S. Bancorp** to pursue more compelling opportunities. And we exited **Vanguard Total World Stock ETF** to deploy the cash into more compelling opportunities.

As broad optimism continues to prevail, geopolitical uncertainties remain elevated. We continually assess potential economic and market drivers in preparation of scenarios that may challenge current market narratives. Many investors appear to be signaling AI fatigue, with a rotation underway towards stocks across a variety of other sectors. In our view, growth stocks are trading at elevated valuations, whereas value stocks remain cheap. We strongly believe reasonably priced, higher quality companies offering sustainable, profitable growth and robust balance sheets will be the drivers of future outperformance. Meanwhile, we continue to improve our upside capture across our international and global portfolios while remaining laser focused on preserving downside protection.

---

Investments in non-U.S. securities may underperform and may be more volatile than comparable U.S. stocks because of the risks involving non-U.S. economies, markets, political systems, regulatory standards, currencies and taxes. The use of currency derivatives and ETFs may increase investment losses and expenses and create more volatility. Investments in emerging markets present additional risks, such as difficulties in selling on a timely basis and at an acceptable price. The intrinsic value of the stocks within the strategy may never be recognized by the broader market. The strategy is often concentrated in fewer sectors than its benchmarks, and its performance may suffer if these sectors underperform the overall stock market.

Past performance does not guarantee future results. For the period ended 9/30/2024, the performance (net of fees) of the Ariel Global Composite (NZD) for the 1, 5, and 10-year periods were +13.83%, +8.69%, and +9.21%, respectively. For the period ended 9/30/2024, the performance for the MSCI ACWI Index and the MSCI ACWI Value Index for the 1, 5, and 10-year periods were +24.43%, +11.86%, and +11.63% and +19.83%, +8.72%, and +8.84%, respectively. Ariel Composite Net of Fees returns are calculated by deducting: (1) for the period from inception to August 31, 2024, the maximum advisory fee in effect for the respective period, applied on a monthly basis; and (2) for the period from September 1, 2024 onwards, the actual monthly advisory fee (on an asset-weighted basis) accrued for the accounts in the composite, using the fee rates in place as of the most recent calendar quarter-end. Gross returns do not reflect the deduction of advisory fees. Client returns will be reduced by advisory fees and such other expenses as may be incurred in the management of the account. Advisory fees are described in Part 2 of Ariel's Form ADV. Returns assume the reinvestment of dividends and other earnings. Returns are expressed in New Zealand dollars. Current performance may be lower or higher than the performance data quoted. The Ariel Global Composite differs from its benchmark, the MSCI ACWI (All Country World Index), because the Composite has fewer holdings than the benchmark.
